RE: Internship/Job Opportunities - Cover Letter

Dear Sir/Madam,

I am actively looking for Internships/Job opportunities for Summer 2017 and beyond. I am interested to work and learn more in the field of Software Development and use the latest available technologies.

As my resume indicates, I possess more than 1 year of progressive experience in the Software Development field. My professional history includes positions such as Associate Professional at Computer Sciences Corporation (CSC) India Pvt. Ltd., as well as Intern at Valtech India Pvt. Ltd.

My responsibilities as an Associate Professional at CSC were of Software Developer role and was part of the Development team that mostly worked on the Java/J2EE, HTML and Scripting languages which I hope matches some the qualifications you are seeking. As an Intern at Valtech my responsibilities were the development of an internal software application based on C++ and MySQL. My supervisors also relied on my ability to manage time efficiently and my capability to visualize the end process.

I am currently pursuing my Master's in Software Engineering at George Mason University. As for my coursework, I have completed Object Oriented Software Spec./Const. (SWE 619), Introduction to Artificial Intelligence (CS 580), Database Systems (CS 550), Secure Software Design and Programming (ISA 681), Software Modeling and Architectural Design (SWE 621) and I am currently in the path towards completion of Software Engineering for the World Wide Web (SWE 642), User Interface Design and Development (SWE 632) and Software Testing (SWE 637) which I feel will further help me to be better in this job role.

I have attached my resume for your review and I look forward to speaking with you further regarding your available positions.

Sincerely,

Nitin Kaveriappa Udiyanda Muthanna
Graduate Student
George Mason University
